Speed Hump Ordinance

Motion was made by David Salisbury and seconded by Jeremy Holbrook to approve First Reading of the following ordinance.

**COMMONWEALTH OF KENTUCKY
BOYD COUNTY FISCAL COURT
ORDINANCE NO. _____**

**AN ORDINANCE RELATING TO THE INSTALLATION
OF SPEED HUMPS, THEIR CLASSIFICATIONS, THE REQUIREMENTS,
LOCATIONS, AND REMOVAL ON COUNTY OWNED ROADS**

WHEREAS, Kentucky Revised Statute Section 189.337 is the controlling statute that requires the Transportation Cabinet, Department of Highways, to promulgate and adopt a manual of standards and specifications for a uniform system of traffic control devices for use upon all roads and streets in the state, including incorporated cities. The Kentucky Transportation Cabinet issued 603 Kentucky Administrative Regulation 5:050 Uniform Traffic Control Devices, which established the manual referenced by KRS 189.337, and states the standards and specifications set forth in the Federal Highway Administration (FHWA) Publication *Manual on Uniform Traffic Control Devices for Street and Highways (MUTCD)* shall apply to all traffic control devices installed on any publicly used highway, road or street in Kentucky.

NOW, THEREFORE, BE IT ORDAINED BY THE FISCAL COURT OF THE COUNTY OF BOYD, COMMONWEALTH OF KENTUCKY:

Based upon the Federal Highway Administration MUTCD, speed humps are traffic calming devices that require motorists to reduce travel speeds as they drive over the device. Speed humps differ from speed bumps in that they are wider and shorter in height. The Institute of Transportation Engineers (ITE) published standards for construction, signage, and markings of speed humps in their recommended practice entitled *Guidelines for the Designs and Application of Speed Humps* and this was adopted by the Federal Highway Administration.

The following criteria will be reviewed before a Boyd County owned roadway is considered eligible for speed hump installation.

SECTION 1 ELIGIBILITY REQUIREMENTS

Support: Although the Boyd County Road Department (BCRD) will utilize processes in order to determine if a segment of road is deemed appropriate for speed humps, generally the homeowners association or neighborhood representative(s) will be responsible for forwarding evidence of support for speed humps. The BCRD will not consider speed humps unless seventy (70) percent of the affected property owners favor their installation.

A petition will be provided by the Boyd County Fiscal Court (BCFC). Only one (1) vote per residential household is permissible. After a petition is filed, notice must be published, and signage posted in three (3) prominent and visible public places within one (1) mile of the roadway for thirty (30) days before the BCFC will take action.

Location of the Road: The land uses of the properties abutting the road where the speed hump is proposed shall be composed of low density residential dwellings. This would include public roadways where fifty percent (50%) or more of the residents are single family residential dwellings.

Operational Characteristics of the Road:

- a. The road shall be used to provide access to abutting low density residential properties. The road shall not be identified as a "Collector" or higher-level street. Speed humps shall not be considered on a street and/or road defined as Thru Streets.
- b. There shall be no more than one (1) moving lane of traffic in each direction.
- c. The road shall have a speed limit of twenty-five (25) mph, or less.
- d. The road shall not be so close to a Fire Department or other public safety facility, nor in the immediate proximity to a healthcare facility such as a nursing home, as to significantly interfere with emergency vehicle operations.
- e. If deemed necessary, the BCRD will also solicit comments from the appropriate Fire District, EMS, Police and appropriate service departments. If comments are

not received within two (2) weeks, BCRD will assume there are no objections. Should they identify significant concerns which cannot be corrected, BCRD will not install Speed Humps.

- f. Speed Humps shall not be considered on alleys.

Geometric Characteristics of the Road

- a. The road should have adequate sight distances to safely accommodate the hump. Sight Distance shall be available based on the speed limit of the roadway.
- b. The road shall not have curves or grades that prevent safe placement of the humps. Therefore, speed humps may be located on roads that contain curves and/or grades, but the hump itself should not be located within a significant horizontal curve, or a vertical grade greater than eight (8%) percent.
- c. The road must be paved. If there are no curbs, a special design of speed hump may be used to prevent vehicles from going around the speed hump.

SECTION 2 COST/MAINTENANCE RESPONSIBILITY

1. The cost for the speed hump materials shall be the responsibility of the Applicant (affected property owners/homeowners association) to purchase. This includes the cost of all speed hump material, warning signs, pavement markings, and, if necessary, special design features such as curbing. The type/style of speed hump ALLOWED to be used shall be coordinated with and approved by the BCRD.

2. The cost the initial installation of the speed hump shall be the responsibility of the BCRD. Only the BCRD (or a contractor hired by the BCRD) shall install the speed hump.

3. Roadways require routine maintenance (snow clearing, new pavement overlay, asphalt patching, etc). Should the speed hump be damaged during maintenance or need to be removed for such roadway maintenance, then the total cost for reinstallation (including labor costs and or new material costs) shall be the responsibility of the affected property owners and/or homeowners association. The homeowners association or residential representative will be notified on the cost to repair/replace the speed hump. If the homeowners association or residential representative are unwilling to pay for the cost of the speed hump repair/maintenance, the speed hump will be removed by the BCRD.

SECTION 3 SPEED HUMP REMOVAL AND ALTERATION

The process for speed hump removal or alteration by citizens is the same as the process for installation. Applicants may be required to assume 100% of the cost for alterations or removal of speed humps that were installed under this policy.

SECTION 4 SPEED HUMP LOCATION

The Boyd County Road Department will work with the property owners to the extent possible on the location of the speed hump. For engineering and/or safety reasons, the best location for a speed hump may be in front of a property where the property owner opposes it. BCRD will take those preferences into consideration, but BCRD will make the final decision on placement.

SECTION 5 DESIGN STANDARDS AND PROCEDURES

The Boyd County Road Department will prepare and maintain current design standards and installation procedures for speed humps according to these guidelines. The BCRD will provide minimum speed hump design standards allowed and types of speed humps available for purchase.

The design and installation of speed humps shall comply with the ITE's Recommended Practice. All signage and pavement markings shall comply with the current edition of the MUTCD and ITE's Recommended Practice, *Guidelines for Design and Application of Speed Humps*.

SECTION 6 PROCEDURES TO REQUEST SPEED HUMP INSTALLATION

1. The Applicant's initial request for the installation of speed jumps shall originate from a representative of the affected property owners or homeowners association from a segment of the street or neighborhood group. The request should be provided on the attached form and

forwarded to the following address: **Boyd County Road Department, Attn: County Road Foreman, 12327 Anthony Drive, Ashland, KY 41102.**

2. If the Applicant does not represent any existing homeowners association for the particular roadway or a homeowners association does not exist for the roadway, then a representative of the area shall submit written petitions (with Names, Addresses, Telephone Number, and Signatures) to BCRD showing that seventy (70) percent of the property owners on the street/road support the installation of speed humps.

3. BCRD will make a preliminary determination of eligibility. BCRD will coordinate with the Boyd County Fiscal Court for their review and approval. BCRD if deemed necessary, will conduct the necessary transportation engineering studies, including, but not limited to: traffic volume, accident analysis, speed study, field review, etc. BCRD will solicit comments and recommendations of other agencies, including, but not limited to, emergency service and appropriate service departments. A determination of the road's eligibility for speed hump installation will be made in writing, in a timely manner, to the applicant's representative, based on the speed hump guidelines.

- a. If the road is determined to be ineligible, the applicant's representative will be given written notification of that determination and its reasons.
- b. BCRD will define the petition area, define the proposed speed hump locations, and determine the total cost.
- c. Once a street is approved for speed hump installation, BCRD will submit a statement to the applicant's representative for the cost of the speed hump installation. The initial cost to the applicant shall be the cost of the speed hump material. Once payment is received, the BCRD will order materials. The BCRD shall be responsible to install the speed hump. Upon receipt of materials, the BCRD will install the speed humps as scheduling permits.

SECTION 7 DEFINITIONS

AFFECTED PROPERTY OWNERS - Includes only those properties adjacent to the right-of-way of the segment of the street where the Speed Humps are proposed or within a subdivision development which has an active Homeowners Association.

APPLICATIONS for SPEED HUMPS - Includes a petition by ballot of the affected property owners/and or Homeowners Association.

FUNCTIONAL CLASSIFICATION - The process by which streets and highways are grouped into classes or systems according to the character of service they are intended to provide. (*Highway Functional Classification and Needs Study Manual*).

Arterial System - provides for through traffic movement between areas and across the city, with limited access to abutting property, but subject to access controls and curb uses.

Collector System - provides for traffic movement between arterials and local streets, with limited access to abutting properties.

Local System - provides direct access to abutting properties.

LOW DENSITY RESIDENTIAL DWELLINGS - Includes single-family houses, townhouses, duplexes, triplexes and quadraplexes.

ROADWAYS - That portion of a highway improved, designed, or ordinarily used for vehicular travel, exclusive of the berm or shoulder. If a highway includes two (2) or more separate roadways, the term "roadway," as used herein, shall refer to any roadway separately, but not to all such roadways collectively.

SPEED HUMPS - Geometric design feature of a roadway, consisting of a raised area in the roadway pavement surface, extending transversely across the travel way, whose primary purpose is to reduce the speed of vehicles traveling along the roadway.

SECTION 8

The provision of this ordinance are severable and the invalidity of any provision of this ordinance shall not affect the validity of any other provision hereof; and such other provisions shall remain in full force and effect as long as they remain valid in the absence of those provisions determined to be invalid.

SECTION 9

This Ordinance shall be in full force and effect from and after its adoption and publication of a summary thereof as provided by law.

Transparency - No Vote Taken

Kaci Abrams, Community Development Director, discussed upcoming contests and events.

Madison Tipton of the Tipton Collective, was back to discuss the proposed mural for the 'Child Support building' Court members ultimately decided that the county will prep the building and try to find funding for the mural, but it is not currently in the budget.

Community Comment

Sheila Lambert approached the court in support of the mural in Catlettsburg.

Terri Clark also is in support of the mural, also clarified that although the building is in Catlettsburg, it is also the County Seat of Boyd County.

Suzanne Griffith voiced concerns over rising electric rates.

Madeline Tipton explained the process of the mural and was advised to present the idea to the Tourism Board for funding.

Tim Stevens, Ironville, discussed changes made to surrounding properties that are affecting his property. He believes it to be a drainage issue.

Rae, Ironville resident spoke in support of Mr. Stevens, advised her quality of life is affected by the condition of her road.

Motion was made by Randy Stapleton and Seconded by Jeremy Holbrook to have this meeting stand adjourned.

Vote as Follows:	Eric Chaney	Yes
